The TRUTH of Universal Background Checks

This vague and confusing proposed law is the handiwork of powerful and wealthy out-of-state political interests, masterminded by New York Billionaire Michael Bloomberg. He wants to use his fortune to impose his will on Mainers.

Most of the people collecting signatures for this initiative were not volunteers , but employees paid for by Bloomberg. Many of them are not even from Maine, and traveled to Maine specifically for the purpose of signature gathering. This is not a Maine grassroots effort.

Learn the TRUTH!
Universal Background Checks are BAD for MAINE!

This proposed law would ban all private transfers (with very limited exceptions), even temporary ones, unless you go through a gun dealer and pay a fee. If you lend a gun, a second trip to the dealer and another fee will be required to get your gun back. This will criminalize many things we do here in Maine on a daily basis.

- Lend your friend a shotgun to go bird hunting? You will both be criminals.
- Get out of the car at the gas station and leave your rifle in the car with your hunting partner? You will both be criminals.
- House sitting at your neighbor's house while they are on vacation, with their firearms in the home? You will all be criminals.
- Leave your rifle at the camp with your fellow campers to make a quick run to the store? You will all be criminals.

A Failed New York Solution to a Problem Maine Doesn't Have
